Department: Business Technology **Program: Management Information systems**	**Academic Year: 2025/2026**
Level: 4	**Semester: Fall 2025**
Course Name: Scientific Research Methodology	**Date :22/10/2025**
Course Code: HM.009-MIS	
Course Instructor: Dr. Ghada Nabil	
Assignment 3	

Compare these two internet texts "The impact of Artificial Intelligence (AI) on decision-making in organizations.**" Which is likely to be more reliable? why**

1

We are all witnessing how AI is taking over everything! Companies everywhere are replacing managers with robots that make better decisions than humans ever could. It's amazing that AI can analyze emotions, predict the future, and even understand feelings! Every smart company is now using AI for decision-making, and soon, humans might not even be needed at work anymore.

2

Recent studies show that Artificial Intelligence (AI) plays an increasingly important role in managerial decision-making. According to a 2023 report by McKinsey, 63% of large organizations have adopted AI tools to improve data-driven decision processes. However, researchers warn that AI should complement rather than replace human judgment, as algorithms can still reflect bias in data. Smith(2024) noted that hybrid decision systems, combining AI and human expertise, tend to achieve higher accuracy and flexibility.
